

A DESIGN ORIENTED STEEL SYSTEM

QUALITY STEEL DOORS, WINDOWS AND FAÇADES

Doors and windows are more than just an entry point between spaces, but also a way to connect the people inhabiting those spaces. In addition to their function, they can add aesthetic value to each space.

PIETBOON by JANSEN

INTRODUCTION

Studio Piet Boon and the exclusive steel producer, Jansen, joined forces to design a high quality and elegant range of steel products that reflect our shared passion for craftsmanship and attention to detail. Within this collection of different and bespoke steel products, Studio Piet Boon's team designed doors, windows and façades made of high-quality steel that are suitable for versatile use. The entire collection is available in 3 typologies: a traditional door, a pivot door and a swivel door, all accompanied by matching façades. All products are available in 8 Piet Boon colors: CHALK, SHELL, DUST, PEBBLE, ROCK, MUD, COAL and BRONZE, varying from lighter to darker tones, and provided in the highest quality finishes from matte to gloss. The refined products are a perfect foundation for any space where aesthetics and functionality come together.

This collection was created in collaboration with J.M. van Delft, Stieva and Lootens as the exclusive producers of this collection.

JANSEN AG

Founded in 1923 and headquartered in Oberriet, Switzerland, Jansen AG develops, manufactures and distributes sophisticated steel profile systems for various segments of the building industry. To this day, the Jansen Group remains a wholly family-owned company that employs worldwide.

Jansen has become one of the world's leading and foremost partners for profile systems for windows, doors and façades as well as folding and sliding doors. Form and function of their steel systems create a perfect unit for individual solutions. With quality in design, Jansen inspires beyond functional perfection. As an active player in the architecture and metal construction sector, Jansen provides satisfaction to architects, investors and manufacturers around the world and are constantly working to further develop their products. The Jansen brand stands for Swiss quality and leadership. With expert knowledge of steel and tailor-made solutions, Jansen will continue to set new benchmarks with innovation.

STUDIO PIET BOON

Studio Piet Boon is a globally operating exterior, interior and product design studio recognized for creating perfectly balanced designs. For every client, our teams compose the perfect balance between functionality, aesthetics and individuality, in order to create an authentic and timeless design. Our full-service approach and capacity to truly listen makes us eager to exceed the expectations of our clients.

The multidisciplinary team designs acclaimed private homes, residential and corporate developments and hospitality experiences. Additionally, the studio designs an extensive range of products for kitchen & dining, living & outdoor and bathroom. The design team consists of experienced designers, architects and stylists who are committed to deliver authentic design at a high level. Studio Piet Boon was founded in 1983 by Piet Boon and Karin Meyn in Oostzaan, The Netherlands.

PIET BOON PRODUCTS

To complement our brand and design ethos, Studio Piet Boon seeks partnerships with like-minded brands and companies that are passionate about delivering outstanding quality. These partnerships result in a wide range of carefully designed products for all indoor and outdoor living spaces that seamlessly complement each other.

Refinement, functionality and timelessness characterize the authentic and distinctive design philosophy of Studio Piet Boon. The love for rich and natural materials, generous proportions, typical forms and an eye for extraordinary details can be found in every piece designed by our team. The interplay of products highlight a cohesive Studio Piet Boon experience; or simply, an addition of individual elements to each space provide a delicate touch of the Piet Boon signature.

PIET BOON BY JANSEN

STEEL DOORS & FAÇADES

This collection of steel doors and frames provide a seamless connection to other spaces, while maintaining privacy and security. The frame's design makes a subtle statement and creates a strong base in every interior and exterior. For the design of these Piet Boon by Jansen products, we played with different proportions for an exciting and interesting flow of lines which create a unique profile full of depth. The door grip is designed in the same way as the glass strip for full integration. Piet Boon door handles are also available to be installed on the pivot doors. This collection of door systems is integrated, functional, sustainable and durable.

Awarded "Best Choice" by NIBE.

STEEL DOORS & FRAMES

CONCEPT

Doors are an important and indispensable element when designing any interior or exterior. With our experience in the design world, we wanted to perfect a product that has been around for a long time.

With simplicity and detail, we crafted beauty and richness into every aspect of the door, including the door handles, frames and glass façades. For the glass, each is aligned in the middle so that both the front and the back of the door have the same beautifully balanced profile. The design is made unique with its use of the open bead. Another detail of the glazing rod is that they are not connected via a mitre joint. This imitative design is applied to both the indoor and outdoor products. We also took inspiration from fine door frames and hinges with interesting architecture. Adding details like depth in hinge direction allowed for an unique and fresh design. The final product is bespoke and widely applicable.

COLORS

Studio Piet Boon believes in neutral palettes that exude sophistication and create a subtle, understated effect. The combination of minimalist design, perfectly balanced proportions and the matte Piet Boon color palette, translate this philosophy into functional products like steel doors and frames. The collection is composed of eight colors created by Studio Piet Boon and blends harmoniously with the brand's color palette and design philosophy. With this extensive color palette, the collection offers a suitable look for every interior and exterior.

Technical information

Suitable for indoor and outdoor

All products within the Piet Boon by Jansen collection are suitable for indoor and outdoor use.

Fire resistance

The Piet Boon by Jansen collection has the following certificates: EW60 - EI30 - EI60 - EI90, depending on test reports available in specific countries.

Sustainable

The Piet Boon by Jansen steel doors and façades are considered as "Best Choice" by NIBE. In addition, the products can be reused and therefore contribute to a recycling and circular economy.

Acoustic insulation

The collection consists of products with good sound insulation.

Passive house insulation

If desired, the product can meet passive house insulation. This ensures very good insulation, indoor air quality and low energy consumption.

Burglar-resistant and bullet proof

If desired, the steel door can be designed in such a way that it is burglar-resistant and bulletproof (RC2/3 for outdoor use).

Virtually maintenance free

Steel doors last a very long time. There is little wear and tear and it improves the TCO (total cost of ownership). If necessary, a maintenance plan can be agreed upon with the owner.

Available in the following:

- Traditional door hinges
- Pivot door hinges
rotatable in 1 direction
- Swivel door hinges
rotatable in 2 directions

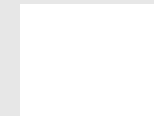

Glass:

- Safety: layered 44.3 or other
- Figure glass
- Stained glass
- Mirror wire glass
