

Piet Boon by Jansen

A design oriented steel system

JANSEN

A close-up photograph of a modern steel door frame. The frame is made of dark, polished metal with a brushed finish. A glass panel is visible, showing a reflection of the surrounding environment. The text "Quality steel doors, for inside application" is overlaid on the left side of the image.

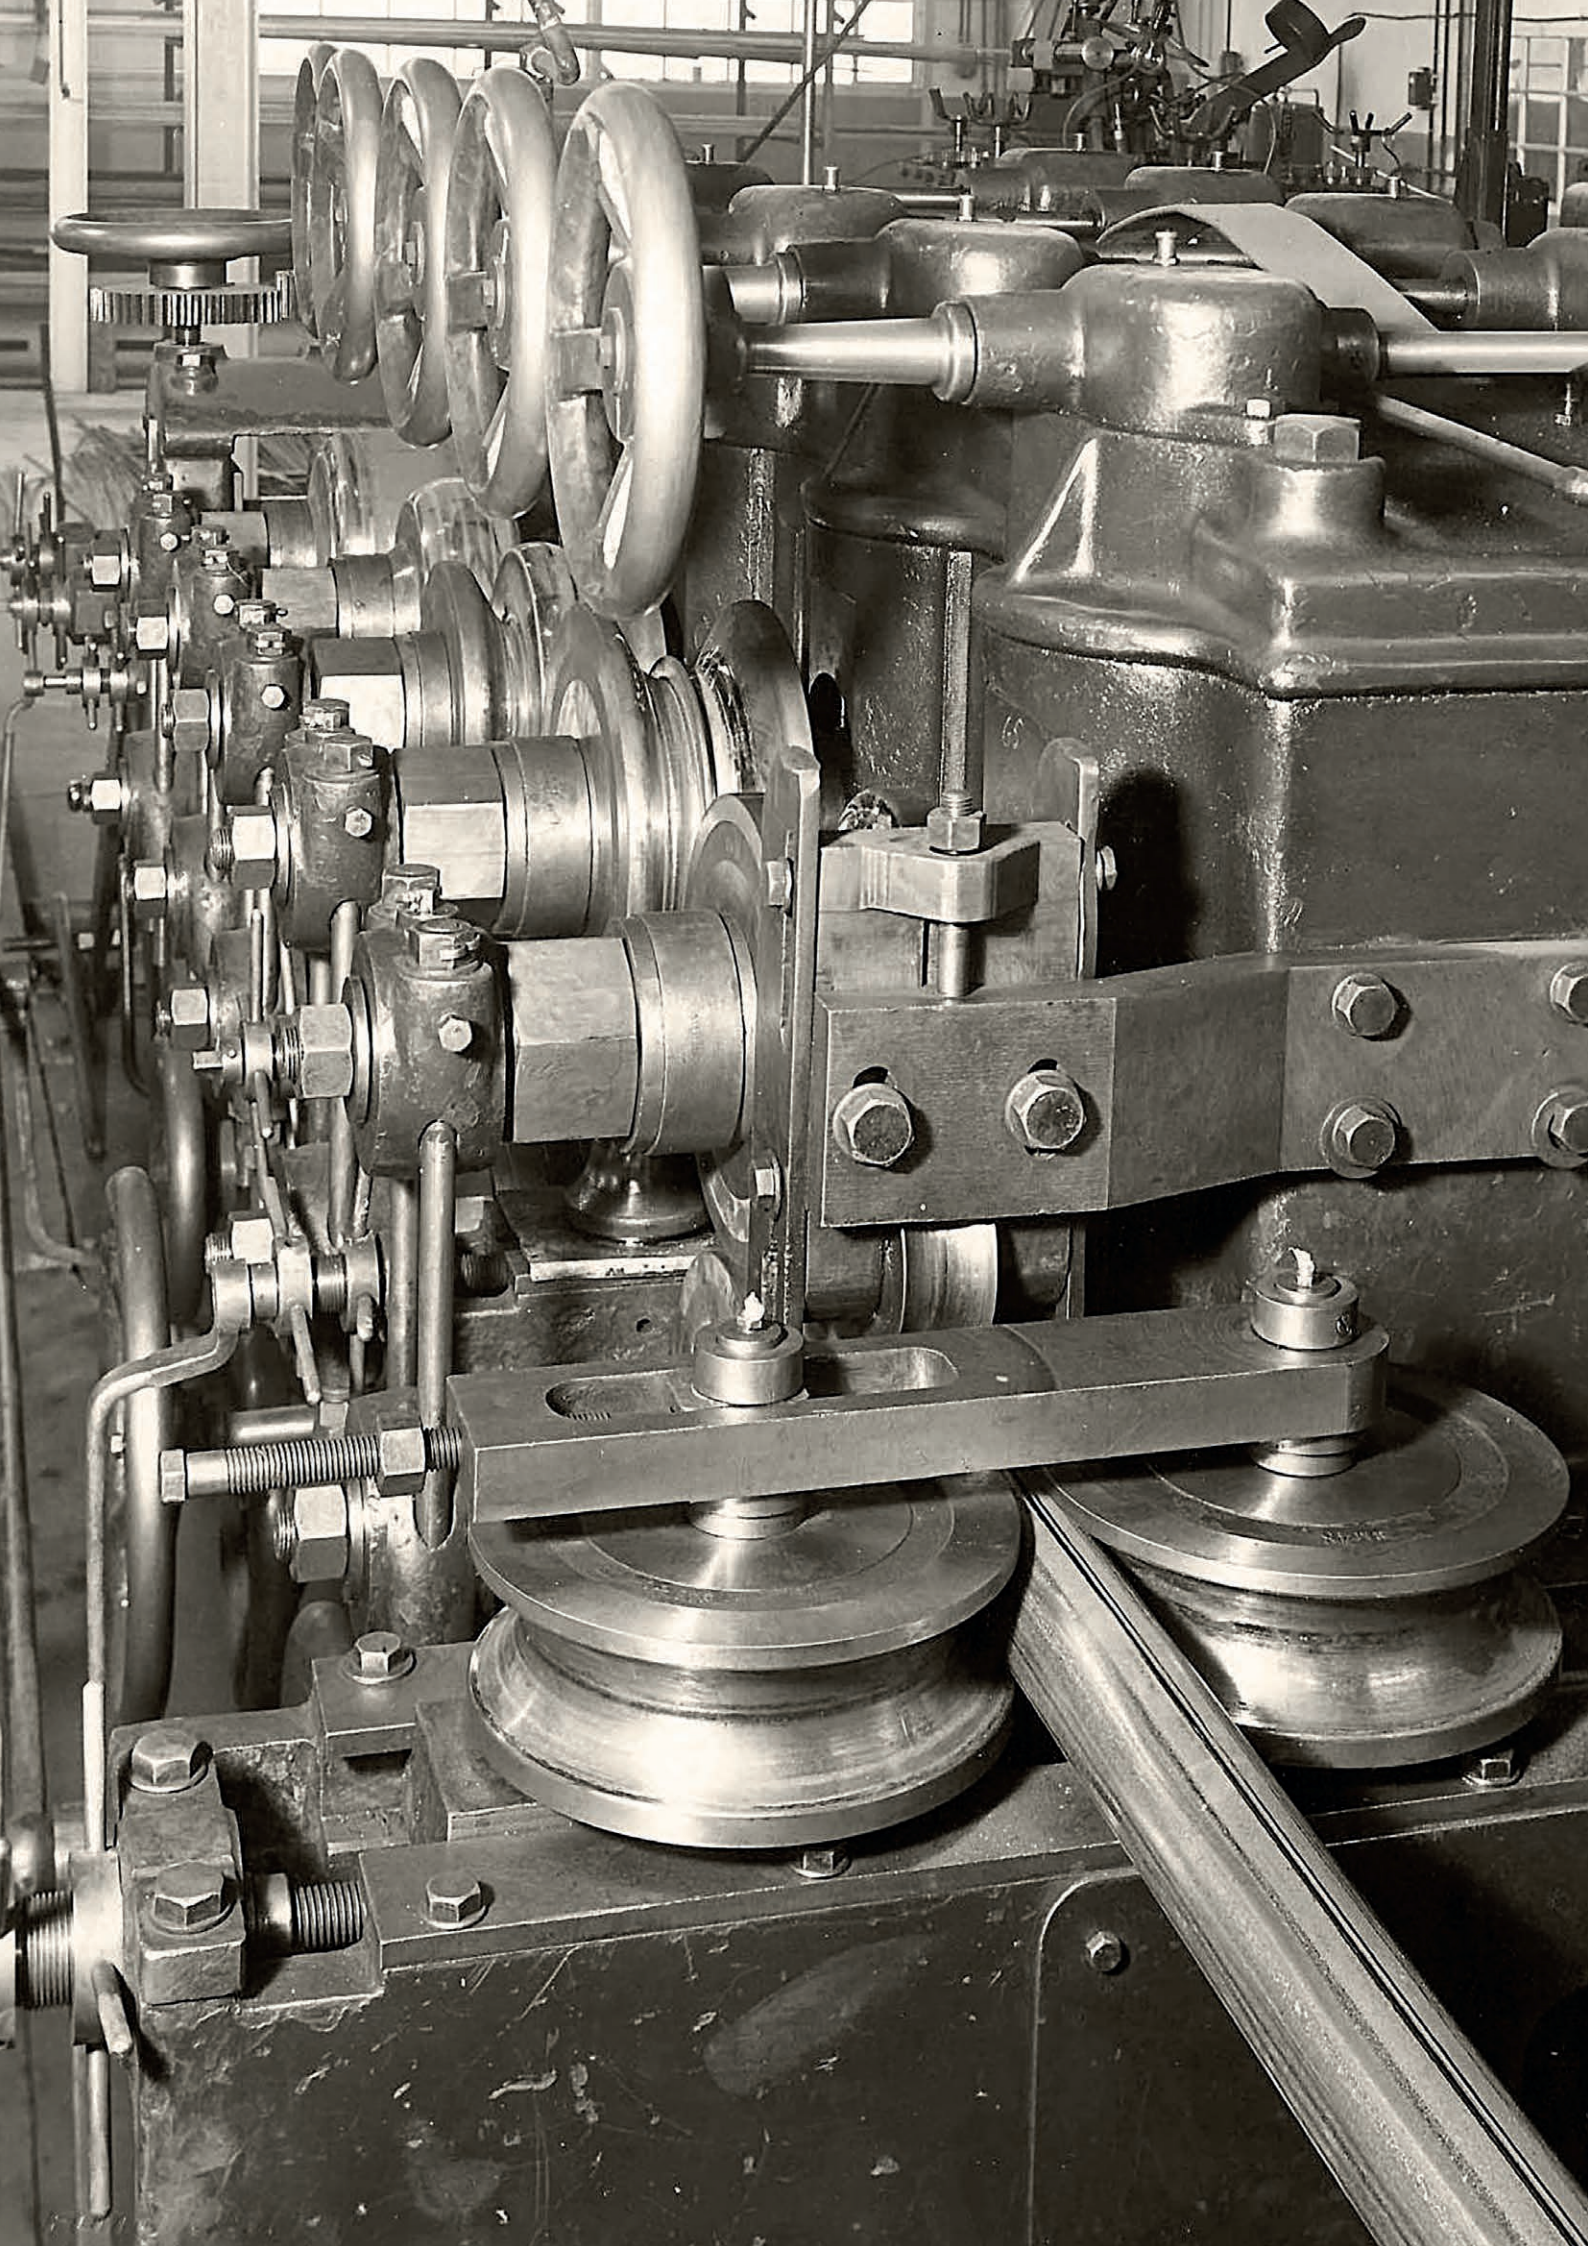

Quality steel doors, for inside application

Doors and windows are more than just an entry point between spaces, but also a way to connect the people inhabiting those spaces. In addition to their function, they can add aesthetic value to each space.

INTRODUCTION

Studio Piet Boon and Jansen joined forces to design a high quality and elegant range of steel products that reflect our shared passion for craftsmanship and attention to detail. Within this collection of different and bespoke steel products, Jansen's team designed doors, windows and facades made of high-quality steel that are suitable for versatile use. The collection is available as a traditional door accompanied by matching partition walls. The refined products are a perfect foundation for any space where aesthetics and functionality come together as a unique symbiosis.

JANSEN AG

Founded in 1923 and headquartered in Oberriet, Switzerland, Jansen AG develops, manufactures and distributes sophisticated steel profile systems for various segments of the building industry. To this day, the Jansen Group is a purely family-owned company that employs around 600 people worldwide.

Jansen has become one of the world's leading and foremost partners for profile systems for windows, doors and façades as well as folding and sliding doors. Form and function of their steel systems create a perfect unit for individual solutions. With quality in design, Jansen inspires beyond functional perfection. As an active player in the architecture and metal construction sector, Jansen provides satisfaction to architects, investors and manufacturers around the world and is constantly working to further develop their products. The Jansen brand stands for Swiss quality, innovation and leadership. With expert knowledge of steel and customized solutions, Jansen will continue to set new benchmarks with unparalleled development.

STUDIO PIET BOON

Studio Piet Boon is a globally operating exterior, interior and product design studio recognized for creating perfectly balanced designs. For every client, the teams compose the perfect balance between functionality, aesthetics and individuality, in order to create an authentic and timeless design. The full-service approach and capacity to truly listen makes Studio Piet Boon eager to exceed the expectations of its clients.

The multidisciplinary team designs acclaimed private homes, residential and corporate developments and hospitality experiences. Additionally, the studio designs an extensive range of products for kitchen & dining, living & outdoor and bathroom. The design team consists of experienced designers, architects and stylists who are committed to deliver authentic design at a high level. Studio Piet Boon was founded in 1983 by Piet Boon and Karin Meyn in Oostzaan, The Netherlands.

STEEL DOORS & PARTITION WALLS

The Jansen systems of steel doors and frames provide a seamless connection to other spaces, while maintaining privacy. The frame's design makes a subtle statement and creates a strong base in every interior. For the design of these Piet Boon by Jansen products, the designers played with different proportions for an exciting and interesting flow of lines which create a unique profile full of depth. The door grip can be designed in the same way as the glazing bead for full integration. This interior door system integrates functionality, sustainability and durability.

CONCEPT

Doors are an important and indispensable element when designing any interior or exterior. With our knowledge of steel systems and Studio Piet Boon's experience in the design world, we wanted to perfect a product that has been around for a long time.

With simplicity and detail, we combined beauty and richness into every aspect of the door, including opening types, frames and glass partition walls. For the glass, each is aligned in the middle so that both the front and the back of the door have the same beautifully balanced profile. The design is made unique with its use of the open glazing bead. Another detail of the glazing beads is that they are not connected via a mitre joint. We were also inspired by the fine door frames and hinges with interesting architecture. Adding details like depth in hinge direction allowed for an unique and fresh design. The final product is bespoke and widely applicable.

TECHNICAL INFORMATION

Suitable for indoor use

Sustainable

The Piet Boon by Jansen steel doors and partition walls are considered as “Best Choice” by Netherlands Institute for Building Biology and Ecology (NIBE). In addition, the products can be reused and therefore contribute to a recycling and circular economy.

Acoustic insulation

The collection consists of products with good sound insulation with a value of R_w 43 dB.

Virtually maintenance free

Steel doors last a very long time. There is little wear and tear and it improves the TCO (total cost of ownership).

Available in the following:

- Traditional door hinges
- Swivel door hinges rotatable in two directions

Glass possibilities:

- Safety: layered 44.3 or other
- Figure glass
- Stained glass
- Mirror wire glass

Dimensions:

Every door and partition wall is custom made. Please contact us for possibilities.
