

Be Inspired

Company Profile

JANSEN
Configure to Inspire

A Swiss family-
owned company
with tradition.
A leading and
highly competent
high-tech supplier.

«Configure to Inspire.» Jansen is committed to innovation. We design the future and develop solutions that inspire our customers – whether as supplier of architectural building systems, supplier of precision steel tubes and sections for the automotive industry or as manufacturer of plastic systems for geothermal applications.

The company

With its strong tradition, Jansen has a wealth of experience to support its ongoing development. Everything is based on mutual trust and the desire to produce top quality. This is the foundation of the Jansen brand, which is highly valued in Switzerland, Europe and the world. As an industrial company, we accept responsibility and – with our energy-efficient product and system solutions – fully support the principle of sustainability.

Our actions are based on values such as partnership, innovation, know-how, the environment and quality.

Materials

Steel, plastic and aluminium determine our activities. We turn these materials into something more. In doing so, Jansen is known for its pioneering and exploratory work. We create new ideas for new products.

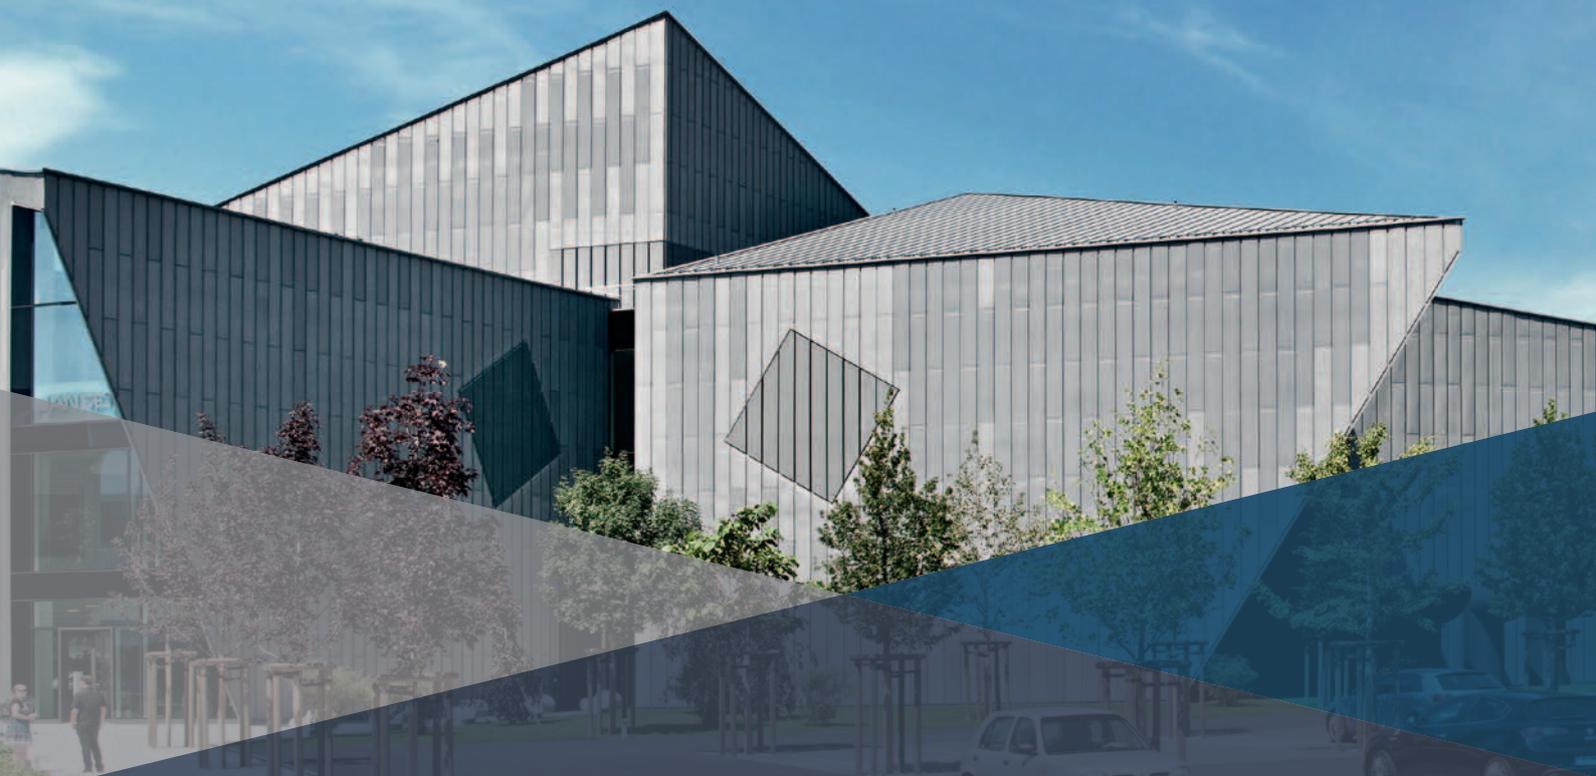

We provide excellent solutions using sophisticated technologies and processes. All in the service of our many customers, who benefit directly from Jansen quality.

Inspiration

We allow ourselves to be inspired, and every day seek new avenues in product development, technology and services.

Innovation is part of our strategy, which helps us to achieve outstanding progress over the long term. We are assisted in that via partnerships with associated companies. It is imperative for us that our solutions are of top quality. Jansen ensures both qualitative and emotional added value. This is evidenced by our range of reputable customers.

We have strong roots, but embrace new developments. We build on experience, and seek progress.

Jansen has both feet on the ground – and continues to assuredly pursue new avenues. We are doers, reliably supplying Swiss quality. We are developers, and surprise our customers with innovation.

History

The foundation for today's successful company was laid by Josef Jansen in the St. Gallen Rhine valley in Switzerland in 1923. The small workshop developed into an international high-tech company. Its pioneering spirit has been retained. Jansen has strong roots and is open to the world, it is firmly grounded and future-oriented. We work with what has been tried-and-tested and at the same time allow space for new and inspiring ideas.

Spectrum of services

Jansen's key services cover all fields of competence including development, manufacturing, customer service and distribution. We continually work on optimising solutions and processes. We aim for sustainable, top-quality products with strong value creation. They stand for Swiss quality, reliability and innovation. Customers appreciate our dependability in the context of holistic process and product services.

The Group

The Jansen Group is entirely family-owned. The workforce numbers about one thousand internationally, including about sixty apprentices. Jansen has offices and distributors worldwide.

In addition to Jansen AG Oberriet (CH), the Jansen Group includes Jansen GmbH Dingelstädt (DE), Jansen GmbH Essen (DE) and distributors in Shanghai (CN) and Istanbul (TR).

You are always
seeking new
ideas.

We are always
providing suitable
solutions.

The bottom of the page features a decorative graphic consisting of overlapping geometric shapes in shades of blue. On the left, a bright blue triangle points downwards. On the right, a darker blue triangle points upwards. These two triangles overlap in the center, creating a dark blue triangular area. The overall effect is a modern, abstract design element.

Jansen sees itself primarily as a cooperative provider of solutions for building systems, precision steel tubes and sections, and plastic systems.

Technologies

Entirely customer-specific - it's what our technology is aimed at. Flexible, swift and tailor-made - Jansen deals with a wide range of requirements. Our technology is characterised by state-of-the-art means of production and efficient and environment-friendly production processes. We are happy to produce both small and large quantities. We use optimal processes to suit the required product and system characteristics.

Services

Jansen provides solutions - including a full range of services. With our in-house process and tool development facility, we are a flexible partner. Jansen carries an extensive range which is extended to suit customer-specific requirements. Long-term technology partnerships are our key to success. Sophisticated logistics round off our range of services.

Solutions

Jansen supplies the right solution - for specific applications in a wide variety of situations. In doing so, we continue to respond to new challenges. New and successful solutions are the result of an integrated approach and cooperation with customers and partners during the development phase. Our solution- and customer-oriented working method is based on tried-and-tested processes and constructive cooperation, supported by comprehensive and certified quality management.

We are organised
in divisions
Together they
form a strong
whole.

The Jansen Group comprises the Building Systems, Steel Tubes and Plastic Solutions divisions. Jansen is one of the leading suppliers in these three fields of competence. Together they make up the Jansen brand.

JANSEN
Building Systems

Shaping new worlds. With Jansen building systems. We develop and produce clever profile systems for windows, doors and facades in steel and stainless steel. Form and function are designed in perfect unity for bespoke architectural solutions.

JANSEN
Steel Tubes

Precision in series. We develop and produce rolled and drawn precision steel tubes and sections for various industrial applications using tailor-made materials and processes. Jansen products are part of a sophisticated overall solution, especially so in the automotive industry.

JANSEN
Plastic Solutions

Intelligent plastic systems. Versatile customer solutions for water and gas supply, heating, air-conditioning and sanitary installations, as well as geothermal applications, guarantee long-term reliability, safety and economy even under extreme conditions.

JANSEN
SCHÜCO

In Switzerland and the Principality of Liechtenstein Jansen holds the exclusive licence from Schüco for the entire range of window, door and facade systems in aluminium, wood/metal and plastic.

Jansen proves its passion. We want to create substantial added value for our customers with every «solution from Jansen» and provide the inspiration to create something new with us.

Academy

The Jansen Academy combines practice with knowledge. This is where the future is. We draw on rich resources: exchanging experience, conveying know-how and honing competence – an enrichment for all involved.

The Jansen Academy is a lively place for knowledge, education and the exchange of ideas. It is far-sighted, focused on solutions and based on a practical approach.

Commitment

As a Swiss company, Jansen boasts progressive energy standards. Because sustainability is close to our hearts, responsible use of resources and processes is the rule. We are committed to sustainable progress, in particular through the development of energy-efficient product and system solutions.

Partnership

Shared values connect us to our customers, just as we have shared interests. We create ideas for products. We are passionate about achieving unique results, and that in turn fuels our passion.

We build on long-term partnerships which are based on trust and continuous development.

Time and again we
create something
special.
That will not
change in the
future.
